OBJECTIVE

Data Scientist with 5+ years of experience in predictive models and data pipelines to drive insights and improve products. Skilled in collaborating with teams to influence decisions using Python, SQL, and data technologies. Focused on optimizing product performance and eager to contribute to exciting analytics teams.

SKILLS

Programming:	Python, R, SQL, Java, C#, JavaScript, NodeJS
Machine Learning:	Python, R, IBM Watson, Fast Ai, Databricks MLFlow
Big Data & Data Engineering:	Apache Spark, Hadoop, Databricks, Apache Airflow
Data Visualization:	Tableau, Power BI, Matplotlib, Seaborn, Plotly
Soft Skills:	Data storytelling, Cross-functional collaboration, Problem-solving, Leadership

EXPERIENCE

Data Scientist II, *Nithio Holdings Inc.* March 2021 - Present

- Improved data onboarding turnaround time by 80% by building a generalized prediction model, which reduced operational costs by 60%.
- Improved overall workflow efficiency by 50% by refactoring base R scripts to Apache Spark, increasing the speed and scalability of data pipelines.
- Optimized model performance by 20% by developing a machine learning validation dashboard, leading to better decision-making and managing model life cycle.
- Collaborating with product(data) and engineering teams to implement new model training workflows, reducing time-to-prediction and improving overall product performance by 30%.
- Leading cross-functional R&D projects, cutting workflow turnaround time by 50%, and playing a key role in influencing product direction through data insights.
- Developing hypotheses and conducting A/B testing in R&D projects to evaluate product features, optimizing decision-making and improving performance using data-driven insights.
- Led investor presentations showcasing our analytics solutions during due diligence for funding rounds.

Data Science Consultant, *UAP Old Mutual Limited* Jan 2021 - June 2021

- Increased cross-sell success rates by 30% through the development of propensity models, providing insights that directly influenced product recommendations and sales strategies.
- Drove a 15% increase in customer acquisition by analyzing user behavior and marketing data from Google Analytics, enabling the product team to refine targeting and engagement strategies.

Data Scientist, *Hiveonline API* June 2020 - Dec 2020

- Developed a reputation scoring engine, enabling over 1,000 underserved farmers to access credit, directly impacting the product roadmap to expand financial inclusion.
- Built backend APIs and collaborated with product managers to integrate scoring insights into the platform, improving user experience and product offerings.

Software Developer, *ATB Techsoft Limited* Aug 2018 - July 2019

- Developed and deployed a custom loan management system that increased loan processing efficiency by 35%, improving user satisfaction and operational speed.
- Created a data visualization dashboard with custom charts to track loan performance and reporting purposes.

PROJECTS

Power Anchors. Developed image recognition algorithms using aerial Google Map images to identify households with solar panels capable of supporting neighboring households. The project aimed to optimize energy distribution and expand access to power in underserved areas.

Market Basket Analysis. Analyzed data using SAS Enterprise Miner and established relationships between product offerings to help a financial institution improve product recommendations to their customers.

Understanding Intergenerational Social Mobility & US Colleges. Obtained and analyzed years of household and children's income distributions. This was used to study the relationship between colleges attended and social mobility for households in the US. The findings can be obtained [here](#)

Analyzing COVID-19 Cases & Deaths in US Counties. Explored and juxtaposed the COVID-19 cases and deaths data for all US counties with population data; created predictive models based on data studied and came up with results which agree with initial COVID-19 research and provide some more insights on the pandemic.

EDUCATION

Carnegie Mellon University	2019 - 2021
Master of Science in Information Technology (Applied Machine Learning).	

University of Lagos	2010 - 2015
Bachelor of Computer Science	

EXTRA-CURRICULAR ACTIVITIES

- Co-organizer for [AI Saturdays Lagos](#)
- World Economic Forum Global Shaper with the Kigali Hub.
